

## Southern Illinois Power Cooperative

### Closure and Decontamination Completion Report for Emery Pond at Marion Power Station

#### Illinois Administrative Code 35 Sections 845.740(e) and 760(e)

SIPC has completed the closure of Emery Pond by removal. The documents attached to this report confirm completed closure and decontamination activities and support the certification of closure and decontamination. CCR removal, decontamination and disposal activities were completed in general accordance with 40 CFR Section 257.102. To comply with federal deadlines, removal, decontamination and disposal of CCR from the former Emery Pond occurred prior to approval of the closure plan submitted to IEPA pursuant to VN negotiations and prior to the effective date of 35 Illinois Administrative Code 845 and thus prior to notice of later adopted Part 845 requirements that became applicable to closures performed after the effective date, but CCR removal and decontamination activities were generally consistent with Part 845 as later adopted and the Emery Pond closure plan as well. The following documents, which confirm completion of the Emery Pond closure and decontamination activities, are attached to this report:

- A) Engineering and hydrology reports:
  - a. Clarida & Ziegler Engineering Co. CQA reports that document the daily and weekly activities during closure, "SIPC Emery Pond Project #20091 On Site Inspection and QAC".
  - b. Holcomb Foundation Engineering Reports, "Daily Field Report Notes".
- B) Photographs showing pre-project, excavation, and post-excavation views of the Emery Pond site.
- C) Written summary in Attachment C of applicable closure requirements and completed activities as set forth in the closure plan and Part 845.
- D) Other information relied on to support closure in compliance with the rules and plans, and in making the related closure certifications
  - a. Topographic diagrams showing the pre and post excavation elevations and amount of material removed from Emery Pond and the Gypsum Loadout Area.
  - b. Documentation on the installation of a geo-membrane for the non-CCR storm water basin that replaced Emery Pond. NOTE – This is not a retrofit since the new storm water basin is not a CCR impoundment.
  - c. Disposal manifests showing amounts of material removed from the Emery Pond site and transported to Perry Ridge Landfill, which is a licensed landfill for storage and disposal of RCRA wastes.
  - d. Daily weather observations during closure activities.
- E) Decontamination and Closure certification by a qualified professional engineer

## SIPC EMERY POND PROJECT #20091 ON SITE INSPECTION & QAC

01-11-21

On Site Pre-Construction Meeting  
SIPC – Wendell Watson, Jason McLaurin  
Clarida & Ziegler Eng.– Patrick Devine, David Rix  
06 – Environmental – Cody Lonas

01-11/01-17

- 06 – ENV – Prepped clay soil berm
- 06 - ENV – Set up GPS coordinates using C&Z Eng. Control points
- Reviewed scope of work with SIPC & 06-ENV
- Started CCR material removal
- HFE (Holcomb Foundation Engineering) on-site for soil sample
- Set up plan for controlling water inflow to project area
- Verified that SIPC will be providing sub-drain dewatering pumps

01-18/01-24

- 06-ENV – brought in additional excavation & hauling equipment
- 06-ENV – Intake structure – Box culvert sections delivered
- 06-ENV – Continued site dewatering
- 06-ENV – Continued CCR removal & relocation
- 06-ENV – Completed CCR removal
- SIPC, C&Z Eng., 06-ENV, & HFE on site 01/20 to inspect CCR removal. Determined that CCR material has been removed.
- C&Z Eng. Surveyor on site to profile excavated area (see report)
- 06-ENV – Started backfill & compaction
- HFE – onsite to make compaction tests (see report) 01/22 & 23

01-25/01-31

- 06-ENV – Continued with dewatering site
- 06-ENV, C&Z Eng, SIPC – conferred & identified existing drain pipe that will be incorporated into pond liner.
- 06-ENV continued with placement & compaction of backfill
- HFE on-site to make compaction test. (see reports) 01/27, 28, 29

02-01/02-07

- 06-ENV continued with dewatering site
- 06-ENV continued with placement & compaction of backfill
- 06-ENV requested an elevation change for bottom of pond at west end
- C&Z Eng. received approval from Hanson Eng. for elevation change
- 06-ENV started excavation for sub-drain system
- Note – two days work stopped due to rain

02-08/02-14

- 06-ENV continued with dewatering
- 06-ENV continued with placement & completion of backfill
- 06-ENV completed sub-drain installation
- HFE onsite to make compaction tests (02/09, 11, 12) see reports
- HFE onsite to collect samples for Hydraulic Conductivity Testing (02/11)

02-15/02-21

- Note: Due to weather conditions, No work this week

02-22/02-28

- 06-ENV dewatered & cleaned up site
- 06-ENV continued with dewatering
- 06-ENV continued with placement & compaction of backfill material
- Note: some in place backfill was removed due to deterioration from weather
- HFE on site to make compaction tests; 02-24 & 02-26 (see reports)

03-01/03-07

- 06-ENV & continued dewatering
- 06-ENV & continued with placement & compaction of backfill
- 06-ENV & completed work on sub-drainage system risers
- HFE & onsite making compaction tests (03-04) see report
- Note: SIPC, Hansen Eng & IEPA discussed & concluded that additional aggregate backfill as previously proposed would not be needed on this project.
- Note: Work delayed again two days this week due to weather.

03-08/03-14

- 06-ENV continued with dewatering
- 06-ENV continued with placement & compaction of backfill
- 06-ENV installed intake structure (box culvert sections)
- HFE on site making compaction tests (03-08, 10)
- 06-ENV completed clay liner placement & compaction
- 06-ENV started smooth rolling of clay liner surface and misc. compaction preparation of HDPE liner placement.
- C&Z Eng. Surveyor on site to make final grade checks (3-11 – see report )
- Note: No work 03-12 thru 03-15 due to weather conditions.

03-15/03-21

- 06-ENV has started additional work on FGD storage area
- 06-ENV excavating FGD storage area
- 06-ENV continued with dewatering

03-22/03-28

- 06-ENV continued dewatering
- 06-ENV continued FGD storage area excavation

03-29/04-04

- 06-ENV continued with dewatering
- 06-ENV continued with FGD storage area excavation
- 06-ENV completed FGD storage area excavation
- C&Z Eng. Surveyor on site to profile/grade excavated FGD area

04-05/04-11

- 06-ENV revised start date of HDPE liner from 04-05 to 04-08.
- 06-ENV sub-contractor Donelson Concrete on site to work on sealing up intake structure connection to existing pump structure.
- 06-ENV continued with dewatering
- 06-ENV continued with FGD storage area backfilling
- 06-ENV Liner sub-contractor Geo-Synthetics representative on site
- 06-ENV Installed 24" HDPE drain pipe from abandoned junction box near west side of FGD area over to & through west end of pond wall.
- 06-ENV continued with smooth rolling of pond clay liner in prep for Geo-Synthetics liner installation.
- Geo-Synthetics crew on site to start prep work on liner installation.

04-12/04-18

- 06-ENV completed final rolling of clay liner
- 06-ENV started with 2'x2' trench for liner anchor around top perimeter of pond.
- 06-ENV started material placement & compaction of excavated FGD storage area
- Geo-Synthetics started installation of geomembrane (HDPE) liner.
- Geo-Synthetics made (4 ea.) destruct tests & patched test areas (all passed)
- Geo-Synthetics made continuous seam tests during geomembrane install
- Geo-Synthetics completed liner installation, cleaned site & demobbed equipment.

04-19/04-25

- 06-ENV completed placement & compaction FGD storage area
- 06-ENV completed backfill & compaction of liner anchor trench
- Donelson Concrete completed grouting & sealing of intake structure
- 06-ENV started site clean-up & demobilization of equipment

04-26/04-30

- 06-ENV completed misc. site clean-up, final grading, and punch list items.
- C&Z Eng. Surveyor on site (4-26) to make final grades on FGD storage area

05-01/05-31

- 06-ENV completed demobilization & clean-up
- 06-ENV seal coated existing pump structure
- Note: end of project documentation & report to be submitted when received & compiled.

The above report was compiled from Daily Book Project #20091

DAILY FIELD REPORT  
 NOTES

Project Location: Street, City, State <b>LAKE OF EGYPT ROAD WILLIAMSON CO, IL</b>	Client or Owner <b>CLARIDA ENGR</b>	General Contractor <b>06 ENVIRONMENTAL</b>
General Location <b>EMERY POND - BOTTOM</b>	Owner or Clients Representative <b>DAVE RIX</b>	Sub-Contractor <b>MAY EXC</b>
Weather/Temp. <b>SUNNY ±40° ↑</b>	Technician <b>STEVE MARCEC</b>	Superintendent or Supervisor <b>KYLE RAYMER - 06 ENV. JESSE MAY</b>

CALLED TO SITE TO CHECK SOIL AT BOTTOM OF  
 COAL COMBUSTION RESIDUALS IMPOUNDMENT (EMERY POND).  
 CONTRACTOR HAD REMOVED MOST OF THE POND CONTENTS DOWN  
 TO SOIL. CONTRACTOR WANTED VERIFICATION THAT CCR HAD BEEN  
 REMOVED DOWN TO SOIL. SUGGESTED THAT HFE COULD RUN SOIL  
 CLASSIFICATION TESTS I.E. PLASTICITY INDEX (ATTERBERG) AND  
 GRAIN SIZE (HYDROMETER) TO PROVIDE AN ACCURATE CLASSIFICATION  
 OF THE EXPOSED SOILS. THE PROBLEM WITH THIS WOULD BE  
 THAT THE CCR WOULD ALSO HAVE THESE VALUES AND THE TESTS  
 WOULD NOT PROVIDE A DEFINITIVE DIFFERENTIATION. HFE TECH  
 SUGGESTED THAT A TEST FOR CHEMICAL COMPOSITION WOULD PROVIDE  
 MORE USEFUL RESULTS. SOIL SAMPLES TAKEN BY HFE FOR TESTING  
 IF REQUESTED.

Attachment B: Photographic Documentation of Closure Activities for Emery Pond

Prior to beginning of excavation 12/7/2020

During excavation 12/23/2020

January 28, 2021

Clay liner being placed, excavation from Emery Pond is complete.

April 16, 2021

Installation of geomembrane liner.

### Attachment C: Summary of Closure Requirements and Completed Activities

1. CCR Removal, Decontamination and Disposal – All visible CCR was removed from the Emery Pond site and the former pond area was decontaminated through excavation and related activities. Disposal of CCR and other excavated materials, including rip rap, was at a permitted disposal facility. CCR removal, decontamination and disposal was generally consistent with applicable rules and the Emery Pond closure plan, for which SIPC did not receive formal approval from IEPA until July 15 2021, months after submission of the plan to IEPA and completion of the field closure work, which was performed in the winter of 2020/2021 to ensure compliance with federal CCR rule deadlines. On site management of the CCR removal and the closure process is described further below. Because the closure activities were performed before Part 845 was adopted and thus before 35 IAC 845.740 became effective, the closure work did not address and thus did not satisfy certain reporting and other provisions of 35 IAC 845.740(c) and (d), which were not applicable at the time of the closure work. However, this does not impact the complete removal of CCR from the Emery Pond site, and its proper disposal offsite.
2. Sediment and Erosion Control Measures –all excavation and removal work was done inside the foot print of the pond and FGD Load Out Area and did not require sediment and erosion control measures as the pond acted to contain all sediment and erosion.
3. Unwatering - Before CCR sediment was removed, it was unwatered. This water was discharged at the existing NPDES discharge.
4. The remaining sediment was dewatered – The dewatered “water” was sent to an existing tank for storage until permitting is obtained for its discharge.
5. Riprap Excavation – The riprap excavated from the former Emery Pond site was sent to the same permitted disposal facility as the excavated CCR. The disposal facility is the Perry Ridge Landfill at 6305 Sacred Heart Road, DuQuoin, IL. Manifests for this material are included in Attachment D.
6. FGD Load out Area – Material, including any CCR, was excavated and removed from this area. The area was sloped to drain toward the proposed Storm Water Basin to prevent surface water run-off.
7. Permanent Stabilization of Disturbed Areas – the perimeter roadway was stabilized with gravel surfacing to minimize wind and water erosion. The roadway was graded to drain toward the proposed stormwater basin.
8. Construct a lined stormwater basin. The new lined stormwater basin was constructed in the foot print of the previous Emery Pond pursuant to a construction permit issued by IEPA. This new basin will not receive regulated CCR material and is not a CCR impoundment. Therefore, it is not regulated as a retrofit. To relieve potential pressure below the liner, a drainage system with pumps was installed beneath the liner. The collected water is pumped into the stormwater basin.

Attachment D: Other Information Relied on to Support Closure

Dear Mr. Brothers,

Thank you for consulting with TRI/Environmental, Inc. (TRI) for your geosynthetics testing needs. TRI is pleased to submit this final report for laboratory testing.

Project: SIPC Emery Pond
TRI Job Reference Number: 63113
Material(s) Tested: (4) Heat Fusion Weld Seam(s)
Test(s) Requested: SAME DAY Peel and Shear (ASTM D 6392/GRI GM19/D 4437/NSF 54/882 mod.)

Table with 2 columns: Codes and descriptions of failure types such as AD (Adhesion Failure), BRK (Break in sheeting), SE (Break in sheeting at edge), AD-BRK (Break in sheeting after some adhesion failure), SIP (Separation in the plane of the sheet), FTB (Film tearing bond), and NON-FTB (100% peel).

If you have any questions or require any additional information, please call us at 1-800-880-8378.

Sincerely,

Handwritten signature of Kendall Villarreal

Attachment E: Decontamination and Closure Completion Certification

## Decontamination Certification and Closure Completion Certification Emery Pond

I am a Professional Engineer (P.E.) in the State of Illinois and President of Clarida & Ziegler Engineering Co. I am the P.E. with oversight for the Clarida & Ziegler Engineering Co. contract with Southern Illinois Power Cooperative for construction observation and oversight for the contract with 06 Environmental related to the closure of Emery Pond and the FGD Loadout Area at the Marion Power Station ("Emery Pond Site"). I have personal knowledge of the 06 Environmental Emery Pond Site closure activities and related documentation performed pursuant to the design documents produced by Hanson Professional Services, Inc. titled "Emery Pond Closure & Storm Water Basin Construction Plans," dated July 14, 2020, and included as Appendix B to the Emery Pond closure plan dated April 15, 2021.

I hereby certify that to the best of my knowledge, and based upon visual observation and other information, all CCR was removed from the Emery Pond Site in connection with the performed Emery Pond Site closure, and the CCR removal action at the Emery Pond Site was completed in general accordance with 35 Ill. Adm. Code 845.740(a) and with the Emery Pond Closure & Storm Water Basin Construction Plans dated July 14, 2020, and included as Appendix B to the Emery Pond closure plan. I further certify that to the best of my knowledge closure of the Emery Pond Site was completed in general accordance with those provisions of the Emery Pond closure plan that apply to the closure activities for which Clarida & Ziegler Engineering Co. had oversight responsibility or as to which SIPC has provided information, including documentation, confirming the work performed.<sup>1</sup>

The removal and decontamination of the Emery Pond Site was complete as of April 5, 2021, and final inspection was complete as of May 28, 2021.

W. Brian Ziegler, P.E.,

<sup>1</sup> Clarida & Ziegler Engineering Co. was responsible for closure work oversight except for the following activities outlined in the Emery Pond Closure Plan produced by Hanson Professional Services, Inc., revision date April 15, 2021: Section 3.4 CCR Sediment Dewatering; Section 3.5 CCR Sediment Sampling; Section 3.8 CCR Management During Closure and Transportation; Section 3.10 FGD Loadout Area; and Section 5.4 Sampling and Analysis/Testing. SIPC has provided information, including documentation, confirming that CCR, including material from the FGD loadout area, was sampled, hauled off site and disposed of properly to meet the requirements of Sections 3.4, 3.5, 3.10 and 5.4 of the closure plan, as to which Clarida & Ziegler Engineering Co. did not have field oversight responsibility.
